The DRS120 soil roller range brings efficiency to a new level

The combination of world-class performance and easy operation makes the REDLINE DRS120 to the right choice when efficiency and quality is mandatory.

The lean operator platform ensures an ergonomic and lean working place. The efficient eccentrics ensure maximum quality with high efficiency.

Operational weight	11,400 kg
Max. operating mass	12,800 kg
Front module weight	6,800 kg
Static linear load	32 kg/cm
Drum width	2,130 mm
Drum thickness	25 mm
Amplitude - Frequency, high/low	1.8/0.9 - 33/33 (mm - Hz)
Centrifugal force, high/low	250/130 kN
Engine rated power @ 2200 rpm	105 hp (79 KW)
Engine type	Dynapac

Bolt-on PD shells for DRS120D for versatile usage

The DRS120D can easily be transformed from a smooth drum to versatile padfoot drum. This ensures efficient penetration and compaction of all kinds of soil.

The DRS120D soil roller with pad shells gives you more maneuverability, when you need to compact in a narrow space.
